### Contents of Full Report

1. Background
2. Revenue Summary
3. Key Offerings
4. Delivery Capability
5. Target Markets
6. Strategy
7. Strengths & Challenges
8. Outlook

## Who is This Vendor Assessment For?

---

NelsonHall's cloud infrastructure brokerage, orchestration, and management services profile on DXC Technology is a comprehensive assessment of DXC Technology's offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of digital services and cloud infrastructure brokerage, orchestration, and management services and identifying vendor suitability for RFPs
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the IT services sector.

## Key Findings & Highlights

---

This NelsonHall vendor assessment analyzes DXC Technology's offerings and capabilities in cloud infrastructure brokerage, orchestration, and management services.

Cloud infrastructure brokerage, orchestration, and management services sit within DXC's Cloud & Platform Services Global Offering Portfolio. In November 2019, DXC announced its Enterprise Technology Stack strategy focused on ITO, cloud, security services, applications, analytics, and advisory services to drive business value. DXC Technology's view is that this approach more accurately reflects how clients view their technology journey.

DXC helps clients adopt hybrid cloud services that best align with their digital transformation strategies, including the adoption of agile and DevOps methodologies and embedding security in everything they do.

DXC takes a consultative-led approach, working with clients to identify their key problems and targeted outcomes they want. It takes an iterative approach where it seeks to test options with clients as opposed to a big-bang approach.

Across Cloud & Platform Services, DXC credentials include:

- ~8k cloud certified employees, and 50k application resources
- ~14k applications migrated to and managed in public/private cloud
- ~2.1m ERP users supported.

## Scope of the Report

---

The report provides a comprehensive and objective analysis of DXC Technology' cloud infrastructure brokerage, orchestration, and management services offerings and capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments
- Analysis of the company's strengths, weaknesses, and outlook
- Revenue estimates
- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts
- Analysis of the company's offerings and key service components
- Analysis of the company's delivery organization including the location of delivery locations.
