Who is This Vendor Assessment For?

NelsonHall's Process Discovery & Mining Technology Evaluation, provides an assessment of Lana Labs' process discovery & mining platform designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Discovery & Mining platforms and identifying vendor suitability for RFPs

- Process reengineering and RPA and intelligent automation center of excellence personnel evaluating process discovery & mining platform capability

- Vendor marketing, sales, and business managers looking to benchmark their platforms against their peers

- Financial analysts and investors covering intelligent automation and process discovery & mining platforms.

Key Findings & Highlights

LANA Process Mining is a capable platform with many features that enable clients to get value from their data, including its open API, where its underlying process mining technology can be access separately.

The platform offers:

- Data extraction, transformation, and loading

- Process analysis

- Process improvement

- Process monitoring.

Digging into the root cause of a problem can be initiated from the analysis used to find the problem. LANA provides an ML-based automated root cause analysis that is initiated from the Deviations screen.

LANA Process Mining is priced on a per-user subscription model.

Scope of the Report

The report provides a comprehensive and objective analysis of Lana Labs's process discovery and mining capabilities, covering LANA Process Mining's functionality for:

- Data extraction, transformation, and loading

- Process analysis

- Process improvement

- Process monitoring

- Corrective action enablement

- Administration.

This report also assesses Lana Labs' product development strategy and strengths and challenges.
