Contents of Full Report

1. Background
2. Revenue Summary
3. Key Offerings
4. Delivery Capability
5. Target Markets
6. Strategy
7. Strengths & Challenges
8. Outlook

Who is This Vendor Assessment For?

NelsonHall's Process Discovery & Mining Technology Evaluation, provides an assessment of Logpickr's process discovery & mining platform designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Discovery & Mining platforms and identifying vendor suitability for RFPs

- Process reengineering and RPA and intelligent automation center of excellence personnel evaluating process discovery & mining platform capability

- Vendor marketing, sales, and business managers looking to benchmark their platforms against their peers

- Financial analysts and investors covering intelligent automation and process discovery & mining platforms.

Key Findings & Highlights

Logpickr offers Process Explorer 360, an open platform for process discovery & mining. It differentiates itself from the market with its patent-pending process event concurrency detection that, when combined with its process clustering, enables it to discover the true number of process variants in the data.

Process Explorer 360 provides ETL capabilities through its LiveConnect software, which is based on Apache Kafka Connect. Data transformation is provided through SQL (by ksqlDB) for data filtering, merging, and other transformations, including anonymization.

Conformance checking in Process Explorer 360 differs from other implementations in that it does not use the traditional reference model-based approach. Instead, it provides the conformance checking against business rules, e.g., SLAs.

Logpickr's pricing revolves around consumption for both cloud and on-premise deployments. All plans provided unlimited user accounts and files and provide capabilities for data ingestion through files and its RESTful API.

Logpickr has ten employees across its two offices in France, Rennes (HQ) and Paris. Six of its ten employees are dedicated to product development and R&D.

Logpickr currently is only targeting enterprises in France.

Scope of the Report

The report provides a comprehensive and objective analysis of Logpickr's process discovery and mining capabilities, covering Process Explorer 360's functionality for:

- Data extraction, transformation, and loading
- Process analysis
- Process improvement
- Process monitoring
- Corrective action enablement
- Administration.

This report also assesses Logpickr's product development strategy and strengths and challenges.
