Who Is This Vendor Assessment For?

NelsonHall's RPA & AI Technology Evaluation profile of UiPath is a comprehensive assessment of UiPath's RPA and AI software designed for:

- Sourcing managers monitoring the functionality and capabilities of existing suppliers of RPA and/or AI technologies and identifying vendor suitability for RPA & AI software RFPs

- Vendor marketing, sales and business managers looking to benchmark themselves against their peers

- Financial analysts and investors specializing in the RPA & AI software sector.

Key Findings & Highlights

UiPath RPA software is separated into a number of distinct roles. The UiPath suite includes:

- UiPath Studio, for automated process mapping

- UiPath Robot, for automated process execution

- UiPath Orchestrator, for automated process/robot monitoring and management.

UiPath Studio is a process designer application for developing and mapping end-to-end processes using a visual drag and drop diagram model, a "Visio-like" workflow designer based on Microsoft Workflow Foundation.

UiPath Robot is bot software programmed to execute processes set up using UiPath Studio. These bots take two forms: UiPath Front Office Robot and UiPath Back Office Robot.

Automated processes/workflows are published to UiPath Orchestrator and deployed and managed from here.

Scope of the Report

The report provides a comprehensive and objective analysis of UiPath's software offerings, capabilities, and market presence in RPA and AI technology including:

- Analysis of the company's offerings and key software functionality within RPA and AI technology

- Analysis of the company's delivery organization in support of its RPA and AI technology

- Analysis of the profile of the company's RPA and AI software customer base, including the company's targeting strategy and examples of current contracts

- Revenue estimates for the company's RPA and AI technology business

- Identification of the company's strategy, emphasis, and planned developments to enhance its RPA and AI technology

- Analysis of the company's and its software's strengths, weaknesses and outlook in RPA and AI.
