

# Process Discovery & Mining Technology Evaluation

## UpFlux

### Report Abstract

May 2020

Bailey Kong

Digital Technology Analyst

NelsonHall

12-pages

### Contents of Full Report

1. Background
2. Revenue Summary
3. Key Offerings
4. Delivery Capability
5. Target Markets
6. Strategy
7. Strengths & Challenges
8. Outlook

## Who is This Vendor Assessment For?

---

NelsonHall's Process Discovery & Mining Technology Evaluation, provides an assessment of UpFlux's process discovery & mining platform designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Discovery & Mining platforms and identifying vendor suitability for RFPs
- Process reengineering and RPA and intelligent automation center of excellence personnel evaluating process discovery & mining platform capability
- Vendor marketing, sales, and business managers looking to benchmark their platforms against their peers
- Financial analysts and investors covering intelligent automation and process discovery & mining platforms.

## Key Findings & Highlights

---

UpFlux brings its clients expertise in healthcare and insurance processes and a platform that is tuned for its current clients' use cases. UpFlux's platform for process mining offers:

- Data extraction, transformation, and loading
- Process analysis
- Process improvement
- Process monitoring
- Corrective action enablement.

Conformance checking center around comparing process executions to a reference ("design") model to identify where cases deviate from the specification. For patient care processes in hospitals and clinics, process models are manually built or loaded as they represent best practice protocols for medical treatments.

UpFlux uses a tiered subscription model.

UpFlux will offer pattern-based association/business rule mining, an approach that combines information related to process outcomes. Building upon discovery of association/business rules, UpFlux plans to add the capability to predict outcomes of open cases and suggest next-best actions.

## Scope of the Report

---

The report provides a comprehensive and objective analysis of UpFlux's process discovery and mining capabilities, covering UpFlux's platform functionality for:

- Data extraction, transformation, and loading
- Process analysis
- Process improvement
- Process monitoring
- Corrective action enablement
- Administration.

This report also assesses UpFlux's product development strategy and strengths and challenges.
