The report provides a forecast for the global document management and managed printer services markets overall and by service line. It covers the following:

- The document management and managed printer services market size for 2013 and the forecast for these markets through 2014 to 2018
- The document management and managed printer services market size and forecast by geography, specifically covering the U.S., Canada, EMEA, U.K., Germany, France, Italy, Asia Pacific, and Latin America
- The document management and managed printer services market size and forecast overall and for inbound document management, outbound transactional mail, outbound print management, and managed print services
- Identification of the leading vendors together with their revenues and market shares by geography.

Key Findings & Highlights

NelsonHall's "Global Document Management and Managed Printer Services Market Forecast: 2014-2018" consists of 27 pages.

The trend to electronic document handling is continuing apace, with low growth in physical record management and storage. However, when moving from physical to electronic records management, it is typically not possible to make a business case for mass scanning of legacy documents. Accordingly organizations tend to adopt scan-on-demand for legacy documents, while seeking to move new document types to electronic management, to the extent feasible within legal and regulatory constraints.

Contents

1. Document Management and MPS Forecast by Geography

	- Global Overview
	- North America
	- United States
