Who is This Vendor Assessment For?

NelsonHall’s digital manufacturing services profile on Infosys is a comprehensive assessment of Infosys’ offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of digital, industrial IoT, and industrial IT services
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the IT services sector and examining growth areas within IT services.

Key Findings & Highlights

This NelsonHall vendor assessment analyzes Infosys’ offerings and capabilities in digital manufacturing services.

Infosys highlights that its manufacturing expertise has a background in product engineering services through its Engineering Services’ Manufacturing Services unit. Engineering Services is one of Infosys’ nine service lines (including ADM, Enterprise Application Package Services, Cloud Infrastructure, Security Services, Digital Experience and Integration Services, Business Process Management, Data and Analytics, Platforms, and Independent Validation Solutions).

In the past twelve years, Engineering Services has expanded its capabilities from product engineering services to services around

- PLM and CAx
- Knowledge-based engineering
- Manufacturing applications, including services around ERPs (SAP Manufacturing Intelligence, Integration, and Analytics and SAP Plant Maintenance), MES, MoMs, robotics, and other shop floor automation systems.
Scope of the Report

The report provides a comprehensive and objective analysis of Infosys’ digital manufacturing service offerings and capabilities, and market and financial strengths, including:

- Identification of the company’s strategy, emphasis, and new developments
- Analysis of the company’s strengths, weaknesses, and outlook
- Revenue estimates
- Analysis of the profile of the company’s customer base including the company’s targeting strategy and examples of current contracts
- Analysis of the company’s offerings and key service components
- Analysis of the company’s delivery organization including the location of delivery locations.
