

Vendor Profile

Quality Engineering

LTIMindtree

Report Abstract

September 2024

By Dominique Raviart

NelsonHall

12 pages

Contents of Full Report

1. Introduction
2. Revenue Summary
3. Key Offerings
4. Delivery Capability and Partnerships
5. Target Markets
6. Strategy
7. Strengths & Challenges
 - 7.1. Strengths
 - 7.2. Challenges
8. Outlook

Who is this Vendor Assessment for?

NelsonHall's Quality Engineering profile on LTMindtree is a comprehensive assessment of LTMindtree's offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of QE and identifying vendor suitability for quality engineering/QA/testing services
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the QE and IT services sectors.

Key Findings & Highlights

LTMindtree has grouped its testing activities into a centralized practice, Quality Engineering Services (QES), mirroring Mindtree's previous structure. QES services ~350 clients.

QES is now one extensive service line with 8.7k practitioners. The sub-practice approach that QES has is uncommon in the industry; the practice highlights that the structure helps career testers to specialize their capabilities and helps LTMindtree raise prices.

QES has P&L responsibility and is structured around the following:

- Delivery, aligned by sector, e.g., banking & financial services, energy & utilities, high-tech, healthcare and life sciences, insurance, manufacturing, media & entertainment, retail consumer goods, transportation, travel & hospitality
- GTM and solutions, including advisory & consulting, presales & solutions support, and service line sales
- Six sub-practices, i.e., enterprise applications, data, automation, performance, DigitalNxt, and domain/vertical. An example of a domain is for a large payment transfer firm, building its compliance capabilities, for instance, through SME recruitment. The sub-practices promote a consulting approach to projects and clients
- 'BizOps': HR: recruitment and workforce management; and operations, e.g., P&L responsibility
- Technology Office: partnerships, incubation of new practices/offerings and solutions, support for emerging geo delivery, and IP.

Scope of the Report

The report provides a comprehensive and objective analysis of LTIMindtree’s QE offerings, capabilities, and market and financial strengths, including:

- Identification of the company’s strategy, emphasis, and new developments
- Analysis of the company’s strengths, challenges, and outlook
- Revenue estimates
- Analysis of the company’s offerings and key service components
- Analysis of the company’s delivery organization, including the location of delivery centers.
