Who is this Vendor Assessment for?

NelsonHall’s process understanding platform evaluation profile on Mimica is a comprehensive assessment of Mimica’s process mining platform’s capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of process discovery and mining platforms and identifying vendor suitability for process understanding RFPs
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the process understanding sector.

Key Findings & Highlights

Mimica offers two products: Mimica Miner and Mimica Mapper.

The Miner and Mapper products offer similar experiences. Both record processes using its desktop recording agent; however, whereas Miner is an unassisted process miner, i.e., runs continuously on a user’s machine, collecting multiple process runs in different processes, Mapper is an assisted process miner, with users capturing one process run at a time by starting and stopping the recorder. Miner’s aim is to identify and prioritize automation opportunities; Mapper is used to generate documentation for specific processes.

These two products support organizations in discovering automation opportunities and pushing these opportunities to automation.

Organizations that are looking to automate a set of unknown processes quickly and with a low cost should shortlist Mimica.
