8. Outlook

Who is this Vendor Assessment for?

NelsonHall's Process Understanding profile on Skane is a comprehensive assessment of Skane's offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of Process Understanding and identifying vendor suitability for Process Understanding RFPs
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the Digital Transformation Technologies sector.

Key Findings & Highlights

The company offers Skane AI, a process intelligence platform that uses a range of AI techniques (including computer vision) to continuously observe how work and tasks are executed to deliver automated process discovery and insights for automation, operational excellence, workforce optimization, compliance, and continuous operations management and improvement at scale.

Recent developments to the platform have focused on Skane Wing which leverages LLMs to analyze process data, and Skane's Data-as-a-Service, which powers its many analytical views and guides and enables clients to consume Skane's data and insights on other platforms.

Scope of the Report

The report provides a comprehensive and objective analysis of Skane's Process Understanding offerings, capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments
- Analysis of the company's strengths, weaknesses, and outlook
- Revenue estimates
- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts
- Analysis of the company's offerings and key service components
- Analysis of the company's delivery organization, including the location of delivery centers.

Process Understanding Vendor Assessments available for:

ABBYY, ActiveOps, Apromore, EdgeVerve, Mehrwerk, Skane, SoftwareAG, Soroco, UiPath.

About The Author

Mike is a Senior Analyst and Operations Officer at NelsonHall. His main research focus is on digital transformation technologies, including RPA, blockchain, IoT, artificial intelligence, cognitive, and machine learning.

Highly regarded for his analytical talents, Mike also leads data modeling and analytics initiatives in support of NelsonHall's ITS and BPS market forecasts and market surveys. He was responsible for transforming NelsonHall's extensive global market forecast engine, including the introduction of NelsonHall's unique interactive Self-Forecasting Tool.
