3. Key Offerings
4. Delivery Capability and Partnerships
5. Target Markets
6. Strategy
7. Strengths & Challenges
 - 7.1. Strengths
 - 7.2. Challenges
8. Outlook

Who is this Vendor Assessment for?

NelsonHall's Attack Surface Management (ASM) profile on Wipro is a comprehensive assessment of Wipro's offerings and capabilities, designed for:

- Sourcing managers monitoring the capabilities of existing suppliers of attack surface management and identifying vendor suitability for attack surface management RFPs
- Vendor marketing, sales, and business managers looking to benchmark themselves against their peers
- Financial analysts and investors specializing in the attack surface management sector.

Key Findings & Highlights

As it relates to attack surface management services, Wipro's services are provided in five main groups:

- CyberShield MDR - which includes the company's threat intelligence and threat hunting services
- CyberShield XM (exposure management) - which aims to increase the visibility of cyber threats across identity, endpoint, cloud, infrastructure and network, applications, and data security using a combination of attack surface management, risk-based vulnerability management, and security posture validation. Wipro's preferred EASM tool is CyCognito. CyCognito detects assets, which are then stored within CyberShield XM's asset database layer. In this manner, CyberShield XM is the hub for Wipro's external and internal ASM, penetration testing, digital risk management, and third-party risk management
- CyberShield modern work - i.e. for the implementation of zero-trust practices across endpoints and identities
- CyberShield Cloud - including DevSecOps and cloud security posture
- Digital Risk Protection.

Scope of the Report

The report provides a comprehensive and objective analysis of Wipro's attack surface management offerings, capabilities, and market and financial strengths, including:

- Identification of the company's strategy, emphasis, and new developments
- Analysis of the company's strengths, weaknesses, and outlook
- Revenue estimates
- Analysis of the profile of the company's customer base including the company's targeting strategy and examples of current contracts
- Analysis of the company's offerings and key service components
- Analysis of the company's delivery organization including the location of delivery centers.

ASM Vendor Assessments also available for:

Eviden, Detectify, Kyndryl, TCS, Tech Mahindra, Unisys, Wipro.

About The Author

Mike is a Senior Analyst and Operations Officer at NelsonHall. His main research focus is on digital transformation technologies, including RPA, blockchain, IoT, artificial intelligence, cognitive, and machine learning.

Highly regarded for his analytical talents, Mike also leads data modeling and analytics initiatives in support of NelsonHall's ITS and BPS market forecasts and market surveys. He was responsible for transforming NelsonHall's extensive global market forecast engine, including the introduction of NelsonHall's unique interactive Self-Forecasting Tool
